BY ALBERT SMITH. ILLUSTRATED BY JOHN LEECH.

PUBLISHED AT THE OFFICE OF "THE MONTH," No. 3, WHITEFRIARS STREET.

Now complete in one volume, elegantly bound for the drawing-room table, &c. price 11s. 6d.

BUILDINGS AND MONUMENTS, MODERN AND MEDIEVAL.

Being Illustrations of the Edifices of the Nineteenth Century, and of some of the Architectural Works of the Middle Ages.

By GEO. GODWIN, F.R.S.

Fellow of the Institute of Architects; Corresponding Member of several Societies.

OPINIONS OF THE PRESS.

"The bold and effective woodcuts which have now appeared for some years past in the weekly sheets of our excellent contemporary *The Builder*, must be familiar to all who are the least interested in architecture, if it were only from the show they make among the saloons of the distinguished personages in the world of letters and science. It will, we are sure, be very acceptable to such as set a higher value upon these prints than the ephemeral pleasure they give on their first appearance, to have smooth and well-printed impressions of them in a very moderate price. In the republication now before us, with the advantage of glossy ink and tinted paper, they assume a beauty which some persons will be naturally prepared to expect, who are not fully aware of the great importance of good printing to wood engravings."—*Gentleman's Magazine*.

"This cheap and handsome volume of the principal edifices which have appeared from time to time in *The Builder* is an exceedingly useful addition to illustrated literature. We know that work is read and purchased by many who have no connection with 'building'; there are, however, a class who are not aware of the value or curiosity of its many engravings, and such persons will, no doubt, avail themselves of this handsome volume of them, printed on finer paper, and with greater care, and accompanied with a proper amount of descriptive letter-press."—*Art Journal*.

"A publication of much merit and interest. The articles are able and sensible, the engravings excellent."—*The Literary Gazette*.

"The idea of republishing in a separate and handsome form some of the best architectural subjects that have been given in *The Builder* was a good one. Besides being thus brought together within a comparatively small and convenient compass, separated from miscellaneous matter of only technical or temporary interest, the woodcuts are so greatly improved in appearance that they scarcely seem to be from the same blocks as before. The same illustrations, or the same number of them, could not have been brought out at the same price had not the blocks been already engraved, and had they not served their purpose in a periodical having an assured sale."—*The Athenaeum*.

"Superior in the artistic world for cheapness as well as for utility and beauty of effect."—*The Standard*.

"This ought to be supported by public patronage, for it certainly affords, at a very moderate price, a greater quantity and variety of illustrations to the eye as well as to the mind than has hitherto been afforded by any popular architectural publication. It appears to us as a judicious plan, illustrating new buildings, together with others of older date."—*The Scots*.

"This is a happy idea, most skillfully carried out. Fine printing, and a deep yellow paper, give a most charming effect to these vigorous and faithful illustrations of the edifices of the nineteenth century, and of some of the architectural works of the Middle Ages; and the work will thus furnish all a gap in popular literature—we have no popular book of consequence on modern architecture. Medieval structures, moreover, have rarely been so ably treated."—*Globe*.

NEW SERIES, published for Beginners. One Volume, its best complete, of columns, churches, bridges, towers representing geometrical solids by forms of buildings, from simple outlines to the coloured representations of real objects, giving increased interest, and enabling the pupil to sketch at once from nature. Their compactness and portability render them invaluable to private families, schools, and DRAWING MASTERS. Single from 7s. 6d. each. Elementary series, Two volumes: advanced series, Three (coloured) from 12s. 6d. each. H. GREEN, 10, St. Martin's Lane, and NEWTON, NEWMAN, &c.

ELY CATHEDRAL.—The Carved OAK-SCREEN and SUB-STALLS for this magnificent building

(now advancing to a state of completion), have been executed by J. BATTER, at the CARVING WORKS, CAMBRIDGE from the designs and plans of G. G. Scott, Esq., the architect. The attention of architects and gentlemen is most respectfully invited to this work, in the Middle Pointed style, as a specimen of what he is now prepared to execute, and estimate for, in any part of the country, as well as Works and Restorations, in wood or stone, of a description suitable for the mansion or village church; and, having every facility, is enabled to offer advantages in price and quality not equalled in the Great Exhibition.

BATHS and CHURCHES.—Many are not

yet aware that a good eight-inch beyond THERMOMETER is now manufactured complete for ONE SHILLING, or with an enamel tube adapted for baths at ONE SHILLING and SIXPENCE. A stronger and ornamented kind for public baths and churches. A selection of many other fine Thermometers by BENNETT, Esq., Chemist, manufacturer to the Royal Observatory, the Admiralty, and the Board of Ordnance.

WATERPROOFED GUTTA PERCHA

PAPER FOR DAM WALLS, is sold only by JEFFREY ALLEN, Esq., 118, Whitechapel, London. PAPERHANGINGS, from carefully selected designs, and of first rate workmanship continue to be extensively manufactured by JEFFREY ALLEN, Esq., on their premises at above. Improved Machinery enables them to offer great inducements to Merchants, Wholesalers, and the Trade, both in the price and quality of their Paperhangings.—Factory, Kent and Essex Yard, 115, Whitechapel.

GUTTA PERCHA CURTAIN and CORNICE RINGS.—These rings have been much approved

by the Society, particularly for screens and bed-pedestals. Owing to the peculiar properties of Gutta Percha, these rings do not make a noise when drawn along the pole or ring. The following sizes may be had, either with or without loops:—Size 1, 1 inch diameter, 1 1/2 inch dia. 1 inch dia. 1 1/2 inch dia. 1 inch dia. 1 1/2 inch dia.

(Patented), 18, Wharf-road, City-road, London.

AN ENTIRELY NEW AND IMPROVED

ORNAMENTAL ENAMEL, especially adapted for the material called ZINC, affording a most economical, beautiful, and durable substitute for Marble, China, or other kind of ornamental Stone, for Pavement, Paneling, Balustrades, Chimney-pieces, Counters, Wash-stands, Chamber-pieces, Stoves, &c. &c. Also for Trays, Jars, Basins, and every other domestic utensil, where elegance, durability, and economy are required. Specimens may be seen in the Exhibition, sec. 32, and all particulars are obtained from the Commission and Agents, Messrs. JOHN HAMPDEN and COMPANY, 448, West Strand, London.

MOST IMPORTANT TO ARCHITECTS, BUILDERS, CAPTAINS, and the Public generally.

In the third section of the Exhibition is shown a very useful Model, intended to illustrate a Method and Apparatus for transmitting and distributing Heat into one or more distant Apartments. Comprising:—Halls, Chambers, Dressing-rooms, and every part of a house, or factory, or workshop, &c. &c. FUMING CHIMNEY PIPES. The Apparatus is the most simple and inexpensive, and the most efficient, convenient, and economy in fuel needs no remark. The invention is entirely new, and for sale.—For any particulars, apply to the Agents, JOHN HAMPDEN and COMPANY, 448, West Strand.
